About Dani's Twins

DANI'S TWINS captures the pregnancy and early parenting journey of Dani Izzie, one of the few people with tetraplegia (quadriplegia) ever to give birth to twins. While a source of great joy, Dani's twin pregnancy is highly unusual and susceptible to an array of risks, ranging from blood pressure spikes that could lead to a stroke to the almost-certain likelihood of preterm labor. When the pandemic strikes, it raises the stakes for an already complicated pregnancy. Dani's Twins has received numerous awards and has been featured on the BBC, the Washington Post, and CBS.
