The U-M CDHW Disability Research Symposium will consist of research and TEDx style presentations highlighting the diverse disability research being conducted at the University of Michigan. The keynote speaker is Dr. Anjali Forber-Pratt, Director of National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR).

Symposium presentations are broadly split between identifying challenges faced by individuals with disabilities and in creating solutions to improve healthcare for individuals with disabilities. Specific session topics address wearable technologies, artificial intelligence, transforming healthcare systems, and the experiences of diverse groups such as Deaf and Hard of Hearing individuals and adults with physical disabilities. A full listing of session topics are listed [our website](https://umich.qualtrics.com/jfe/form/SV_4NPyAk1yPCL174q).
